

Smarter Compliance with Enriched Component Intelligence

GoCompliance and SiliconExpert are proud to be partnering with the mission to deliver a smarter, faster, and more data-driven approach to product compliance.

Together, we're helping companies simplify the complexities of global regulations by embedding rich, real-time component intelligence directly into the compliance workflow.

Why This Partnership Matters

In fast-moving regulatory environments, accurate and up-to-date parts data is essential. This is why GoCompliance and SiliconExpert's collaboration represents such a powerful synergy in the compliance and supply chain management sector.

The combination of GoCompliance's expertise in regulatory compliance, combined with SiliconExpert's robust database of electronic components and supply chain intelligence, provides a fully comprehensive solution to your business' critical need for supply chain resilience.

GoCompliance integrates seamlessly with SiliconExpert's expansive database, covering over one billion components, to bring trusted compliance, lifecycle, and sourcing information directly into Oracle Cloud PLM environments.

The Value We Deliver

Enhanced Compliance Management

GoCompliance's tools streamline regulatory compliance processes, while SiliconExpert provides real-time data on component obsolescence, environmental regulations, and conflict minerals. Together, we enable businesses to proactively manage compliance risks and avoid costly penalties.

Global Component Visibility

With GoCompliance and SiliconExpert, your team gains complete component visibility, with real-time data on electronic, electromechanical, and mechanical parts. Covering everything from compliance status, lifecycle stage, environmental data, and more. Together, GoCompliance and SiliconExpert provide full transparency across every part of your product

Supply Chain Resilience

SiliconExpert's predictive analytics and insights into supply chain disruptions complement GoCompliance's risk assessment capabilities. This partnership empowers businesses to mitigate risks, optimize procurement strategies, and ensure uninterrupted operations.

Automated Compliance Intelligence

This partnership empowers your business through automation, eliminating the need for time consuming manual lookups, spreadsheets and fragmented data sources. Instead, enrich your internal records and supplier declarations with authoritative data from SiliconExpert to support faster, more accurate compliance decisions across RoHS, REACH, SCIP, PFAS, TSCA, Conflict Minerals, and other global directives.

Data-Driven Decision Making

The integration of SiliconExpert's comprehensive component database with GoCompliance's compliance software allows businesses to make informed decisions based on accurate, up-to-date information. This reduces uncertainty and enhances operational efficiency.

What This Means For Your Business

The GoCompliance + SiliconExpert partnership delivers measurable benefits, including reduced compliance costs, improved supply chain visibility, and enhanced operational agility. Businesses can focus on innovation and growth, knowing their compliance and supply chain risks are effectively managed.

The Result

A scalable, automated, and intelligence-led compliance process that reduces risk, accelerates product development, and ensures regulatory alignment globally.

This partnership exemplifies the power of collaboration in addressing complex business challenges. By leveraging the combined strengths of **GoCompliance** and **SiliconExpert**, we are setting a new standard for compliance and supply chain management solutions.
