# Compliance as a Service

Leave the complexities of product compliance to us.

We manage your compliance data, gather necessary information, and obtain certifications (**RoHS, REACH, Conflict Minerals**, etc.), so you can focus on your core business.

## Key Features

### Supplier Collaboration

We engage directly with your suppliers to collect material information, manage data requests, and ensure timely and accurate submissions (for both COTS and custom parts).

### Material Declarations

We meticulously gather data and generate accurate material declarations for all your parts, ensuring compliance with regulations like RoHS, REACH, Conflict Minerals, and more.

### Compliance Roll-ups

Our platform provides intelligent automation to roll-up compliance statuses from the lowest-level parts all the way up to the orderable product, ensuring complete visibility and accuracy at every stage.

### Compliance Expertise

Our team of compliance experts provides guidance and support throughout the process, ensuring you remain up-to-date with the latest regulations and best practices.

### Reporting and Analytics

We generate comprehensive reports on compliance status, identify potential risks, and track key performance indicators (KPIs).

## Benefits

### Reduced Compliance Costs

Eliminate the overhead associated with manual data collection and analysis.

### Improved Accuracy

Minimize errors and ensure consistent, high-quality material declarations.

### Increased Efficiency

Streamline compliance processes and accelerate time-to-market.

### Mitigated Risk

Proactively identify and address potential compliance issues.

### Seamless Scalability

Easily adapt to changing regulatory requirements and business needs.

### Fuel Innovation

Free up valuable resources to focus on innovation and product development.

## Service Levels

### Standard

Material data collection, declaration creation, supplier collaboration, analytics & reporting.

### Premium

Includes Basic features plus proactively managing any specification versioning updates and advising on subsequent supply chain risks.

Contact us today to learn how our **Compliance as a Service** powered by the **GoCompliance** platform can help your organization achieve its compliance goals more efficiently, quickly and at a lower cost.
