

# GoCompliance

## Key Capabilities

Automatically flags non-compliance

Multiple User Roles

Compliance Roll-ups and Business Objects

Detailed Reporting

Unparalleled configurability with flexible regulations

Everything in One Place

Enhanced collaboration to improve transparency between cross-functional teams and third parties

Comply with environmental regulations such as RoHS, REACH and Conflict Minerals

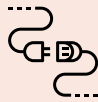

## Explore the Future of In-House Product Compliance

Superior data management and maximum security

Comprehensive analytics and improved validation workflows

Seamless integration with Oracle Cloud PLM & Oracle Agile PLM

Real-time component data powered by SiliconExpert and other providers

Single Source of Truth: Compliance Data evaluated across BOMs and AMLs

Enhanced collaboration to improve transparency between teams

## Business Benefits

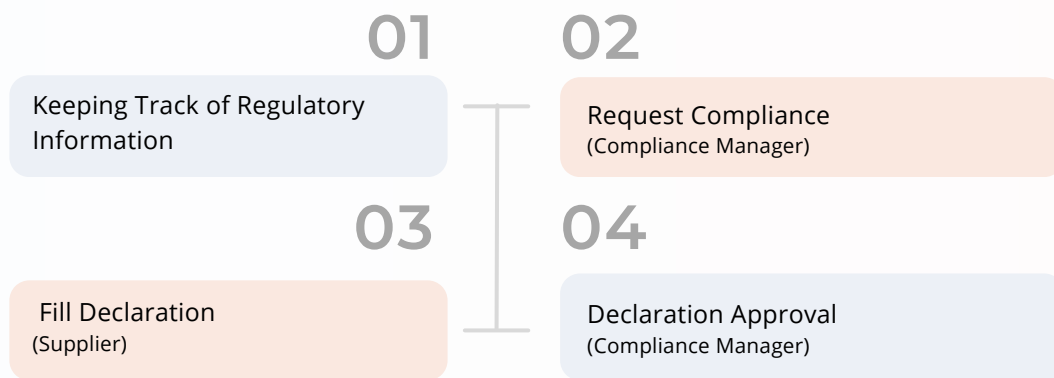

- One shop compliance solution for RFI (Request for Information) process.
- Minimize repercussions associated with compliance by promptly detecting and addressing "compliance" issues.
- Enhance data quality and operational efficiency via our supplier declaration process, which employs validation tools to uncover and rectify reporting errors or deficiencies.

## Who Needs GoCompliance?

Any customer that requires help with:

1. Substance Regulations
2. Product Specific Safety standards
3. Voluntary Standards
4. Requirements for Documentation

## How Does it Work?

Item: SE-180-00001(2699) - REACH Annex XIV
